SHARK BLADES RGB FAN

ADDRESSABLE
RGB

16.8
MILLION COLORS

Colorfully Customized

Twenty circularly arranged addressable RGB LEDs provide a strong illumination, which can be controlled and customized via the software of compatible mainboards in 16.8 million colors.

The rubberized contact points minimize vibration transfer, and an optimum low-noise operation is guaranteed.

The robust 120 mm fan with a fluid dynamic bearing produces an airflow rate of 94.8 m³/h at 1,200 rotations per minute and does not exceed 18.2 dBA even during maximum operation.

Easy to Integrate

The SHARK Blades RGB Fan is certified for Asus Aura Sync, MSI Mystic Light Sync as well as Gigabyte Fusion and is thus easily incorporated into existing systems.

ADDRESSABLE RGB

Sharkoon products marked with the "ADDRESSABLE RGB" logo are compatible with mainboards which have headers for addressable RGB LED fans and strips. The headers should have the pin configuration 5V-D-coded-G and 5V-D-G. Examples of these RGB connections from the most important mainboard manufacturers are shown below.

The RGB pin configuration is independent of manufacturer. However, the naming and marking of these connections may vary between manufacturers. For further information concerning compatibility, refer to the manual of your mainboard, or visit the manufacturer's website.
